-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 calls for "the set of one or more baffles"; however, it depends from claim 1 which calls for "a set of two or more baffles".

Claim 2, "Wherein" should not be capitalized.

Claim 12, "a outlet" should be --an outlet--.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 3-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Finley et al. (US 6313545).

Finley et al. discloses a flow limiting inlet structure (see Fig. 14) comprising a tiered set of one or more baffles (40) coupled to an outlet (this is considered as the horizontal and inclined portion of member (20) depicted in Figs. 4-8, 14), a discharge riser (this is considered as the vertical portion of member (20) depicted in Fig. 14).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-2, 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Finley et al. '545 (Fig. 14) in view of Finley et al. '545 (Fig. 9).

Finley et al. (Fig. 14) discloses a flow limiting inlet structure (see Fig. 14) comprising a tiered set of one or more baffles (40) coupled to an outlet (this is considered as the horizontal and inclined portion of member (20) depicted in Figs. 4-8, 14), a discharge riser (this is considered as the vertical portion of member (20) depicted in Fig. 14).

However, Finley et al. (Fig. 14) is silent about the riser (this is considered as the vertical portion of member (20) depicted in Fig. 14) including a plurality of openings. Finley et al. (Fig. 9) teaches a riser having a plurality of openings (this is considered as the vertical portion of member (20) depicted in Fig. 9 having a plurality of openings (110)).

It would have been considered obvious to one of ordinary skill in the art to modify Finley et al. (Fig. 14) to include the riser with a plurality of openings as taught by Finley et al. (Fig. 9) since this would be a design choice to use a power generator as taught by Figure 9.

Response to Arguments

7. Applicant's arguments with respect to claims 1, 3, 4 have been considered but are moot in view of the new ground(s) of rejection.
